THE INDISPENSABLE NEW GUIDE TO CAR INSURANCE

SWEET & MAXWELL

THOMSON REUTERS™

NEW TITLE

# CONSTRUCTION ALL RISKS INSURANCE

Paul Reed QC

**Construction All Risks Insurance** is a unique reference guide that offers you a comprehensive and contextual analysis of Construction and Engineering All Risks (CAR) insurance.

Covering CAR insurance from its origins to current day practice, this new title covers the fundamentals of CAR insurance both in relation to project policies and contractors' annual policies.

## PRACTICAL ADVICE, INDEPTH GUIDANCE

You will find a wealth of practical guidance on the many aspects of CAR insurance, from arranging coverage or making claims, to facing disputes.

Offering clarity on the structure of CAR policies, you will have all the information needed to understand the various clauses including issues such as rectification, fortuity, loss and damage clauses and warranties.

## THE CLAIMS PROCESS CLOSE UP

**Construction All Risks Insurance** helps you to avoid pitfalls and find solutions to potential issues that can arise within CAR claims.

It looks in detail at the claims procedure itself, providing a breakdown of the processes and potential problem areas often faced once a claim has been made by an insured against a CAR policy.

The wide range of exclusions that can apply to CAR policies and their significance are discussed, including defects and standard exclusions. You will also find coverage of problematic areas including causation and co-insurance.
